

Service Technician - Atlas Copco - Newark, NJ

Job Description

Perform routine, preventative maintenance and repairs on oil-injected and oil-free air compressors. Preventative maintenance should be conducted in accordance with manufacturer's recommendations (with regards to schedule and scope). Troubleshoot and perform diagnostics on malfunctioning compressors, determine possible causes for malfunctions, and perform repairs as suggested by diagnostics and assessment. Prior to and following preventative maintenance and repairs, test and document the proper operating parameters of the compressor. Provide basic tools to accomplish job along with normal maintenance of tools and equipment.

Display the ability to absorb a higher level of learning including VSD's, refrigeration, industrial networks, remote monitoring, and air audits. Provide a high level of customer service, responding to customer needs and working to satisfy customer expectations. Develop rapport with customers through effective communication, interpersonal skills, and professionalism.

Must participate in a rotating on - call schedule.

Serve as an ambassador for the company, promoting the Atlas Copco "Way".

Display the ability to manage time accordingly. Must have the ability to work and solve problems independently. Promote and practice proper safety procedures and the correct use of personal protective equipment at all times.

Perform other duties as assigned.
