The subject site is currently developed with a 2.5 sty dwelling and detached garage. The proposal includes demolition of existing structures.

The subject site is located in R-2 Residential District, wherein two family is a permitted use. However, the proposal needs bulk variances.

2. TRC Committee recommendation

With this proposal applicant is proposing to create two undersize lots and propose two family units on each of the lot. The TRC Committee recommended applicant to determine the need to create two undersize lots in the zone. The Committee recommend applicant to conduct a thorough study of the surrounding lots, to determine the compatibility of the proposal with the surrounding lots.

Lastly, Committee was concerned regarding the easy conversion of the family and 4th bedroom rear of the proposed garage as an additional dwelling.

The TRC committee concludes that this proposal should be modified to determine compatibility with the neighborhood. Any living areas on the ground/garage level should be designed to prevent it from being convertible to separate apartment i.e., removal of bathroom and separate entrances.

If you should have any questions with regard to the above matter, please do not hesitate to call.
